

Product Information Sheet

SACOX[®] **(salinomycin sodium)** **Type A Medicated Article**

Product Information

SACOX[®] (salinomycin sodium) is an ionophore anticoccidial for use in chickens to prevent coccidiosis caused by *Eimeria tenella*, *E. necatrix*, *E. acervulina*, *E. maxima*, *E. brunetti* and *E. mivati*.

Sacox contains:

- Salinomycin equivalent to 60 grams salinomycin sodium activity per pound of premix.
- Calcium carbonate carrier with a flow agent and mineral oil to control dustiness.

Product Features:

- The Intervet salinomycin molecule is the world's leading coccidiostat and has an 18-year record of successful commercial use in the USA.
- Provides reliable protection against coccidiosis, acting on three stages of the parasite's life cycle.
- Spray-dried micro-granulation process ensures consistent salinomycin activity in every granule of Sacox premix.
- Careful control of carrier particle size and dust helps minimize fines and clumping, which can lead to problems with clogged pneumatic dust filters, bridging micro bins and carryover contamination.
- Readily assayed in the finished feed.
- Proven stability under modern feed milling conditions.

Description:

Sacox[®] (salinomycin sodium) is a polyether ionophore anticoccidial produced through a highly controlled fermentation process. The product contains the dried biomass of salinomycin sodium spray-dried in a micro-granulation process onto standardized calcium carbonate particles.

Product Use:

Sacox is available in 50 lb multi-walled bags with 60 grams of salinomycin activity per pound of Type A medicated premix. **Sacox** is approved for use at 40 - 60 grams per ton of medicated feed. It is approved for combination use with most antibiotics and feed additive products. Check your Feed Additive Compendium for a complete list of combination approvals.

Withdrawal Period:

Sacox has no withdrawal requirement.

Stability:

Sacox premix has an 18-month expiration-dating period. The product is stable in finished feeds and can be assayed microbiologically. Information about assay procedures for premix and finished feed is available from your Intervet Sales Representative.

Warning:

Do not feed this product to laying chickens. This product may be fatal if accidentally fed to adult turkeys or to horses.
